Lemont Pa.
August 3 1912

The monthly meeting of the College Township Supervisors was held August 3, in the Township Consolidated School House, at 8. P.M., All members of the Board being present. The minutes of the meeting held May 15th were read and approved.

Harris Township supervisors were represented at the meeting by Mr Smith and Gingerich. The two Boards discussed the securing of reinforced concrete markers to be place at certain points on newly surveyed township line between the two townships. The Boards jointly agreeded to having the College Township Secretary, get specifications from the surveyor, J. Thompson Henry and proceed to get several prices on the construction of these markers, and make a report of his findings to the two boards.

P. W. Kneff of Millbrook meet with the Board relative to certain road or roads being put on township through the proper procedure. The Supervisors of College Township are of the opinion that this road or roads should not be placed on the Township for two reasons.

First: There is a certain drainage problem connected with this road or roads, that would place a burdensome, and unnecessary expense on the Township. What is meant by the aforesaid "unnecessary expense", is that this drainage problem, should have been taken care of by the proper authorities at the time this new road, known as route #56 on State Highway map, was constructed.

Second: This road or roads are too narrow, and to make them wide enough for two cars to pass.

would require the moving of buildings and telephone and electric light poles, which would involve considerable property damage.

There being no further business to come before the Board, the meeting adjourned at 10. P.M.
