Lemont Pa.

June 7, 1949

Supervisors met at above place and date at home of Elwood G. Williams, all members present.

On Motion by Walters and second by Williams the supervisors passed a resolution opposing the abatement of interest and penalties on taxes according to House Bill 1216 which was passed by the Legislature and signed by the Governor. Accordingly a copy of the resolution was sent to the Centre County Commissioners.

Bills, amounting to $118.57 for culvert pipe in Lemont, were approved for payment. Part of this amount is to be recovered from property owners who are to pay for pipe installed along their respective driveways.

Discussed the matter of constructing a bituminous surface road through Horseville, Route 376, [redacted]

Williams made a motion, seconded by Lee and Walters, that considering that this road had been let to contract to be built in 1941 and contract was canceled because of shortage of materials caused by World War II, and because of the amount of traffic over the road, the township should undertake to build this road. Labor is to be furnished by College Twp., materials are to be bought on bid and applied by successful bidder, and equipment is to be rented. Work is to begin as soon as these matters can be cleared and an agreement reached with the property owners along the road. Work will be done by contract if a suitable bid can be secured.

Owners along newly constructed roads in Lemont are to be asked to sign a form waiving damages and agreeing to pay for culvert pipes where they have been installed under respective driveways.

Elwood G. Williams
