Lemont, Pa.
Apr. 9, 1957

The Supervisors met at William's place and then went out on the Twp. Roads and looked over several projects. The Supervisors met at 6:30 O'clock P.M. The following Supervisors were present, S. Weaver, C. Weaver and E. Williams. We first went over to Armour Village and looked over a piece of road where there has to be some ditching done and a culvert pipe changed. The culvert pipe was put in the wrong place; it drains thru a lot and it should have drained thru the 3 feet easement between the lots. The Supervisors decided to change it as soon as weather is fit. We then went up the White Hall Road to where we have another water problem. It is where Bill Everhart put a street back thru. There is an awfully lot of water laying there in that corner. It will take a pretty deep ditch to take it away. The Supervisors decided to wait until a little drier weather and see whether it is all surface water or whether the State College Water line is leaking. It seems like an awfully lot of water for just surface water. The secretary was instructed to go ahead and get things ready to let out for bids the Resbinning & Rock Lapping of the Houserville road and Walnut lane.

Approved: Lester M. Weaver
